

www.smart3d.tech

Smart3D Slicer installation:

Note: before starting, uninstall and delete any older version of the Smart3D Slicer. First proceed with the download of the software from the link:

www.smart3d.tech/software releases/Smart3Dslicer.rar

1. Once the download is done, extract file in C disc. Place the zip file in C disc, right click, and select **Extract here.**

2. Open the file and click on Smart3dslicer_V2.0, to start the Slicer.

You will se the following image on your screen;

Once the installation procedure has finish, the Smart3D Slicer will open;

3. Now you can choose the .stl you want to print

How to import new profiles

To import the last version of a profile to the slicer, follow this procedure:

a. Open the following link, and download the last Config Buldle.

https://www.smart3d.tech/software_releases/ConfigBundle

b. Go to File > Import > Import Config Bundle.
